

The Burns range of holistic pet foods was developed by Veterinary Surgeon John Burns.

Burns foods are **simple and natural**. They assist in the maintenance of good health by reducing build-up of toxins in the system.

Only top quality ingredients:

- Chicken, pork, lamb or fish
- Brown rice, white rice, potato
- Oats, corn, peas
- Chicken oil, sunflower oil
- Seaweed, minerals, vitamins

Hypoallergenic - no wheat, soya, beef, or dairy products (the most common causes of food allergy) which can lead to problems with skin, coat, and digestive tract.

Burns cat and dog foods are suitable where holistic veterinary treatment is being used for the **nutritional management of disease**.

We do not use chicken meat from battery hens and our fish comes from a sustainable source.

Feeding Guides

Amounts may be adjusted to meet the needs of individual pets. Please contact us if in doubt.
